

MAGNA
MACHINE & TOOL, INC

ABRASIVE WATER JET MACHINING NOW AT MAGNA MACHINE AND TOOL

Offering high precision, fast cutting speeds for metals, composites, glass and plastics. For a variety of thicknesses, you can expect exact, satin-smooth edges.

**DELIVERED IN MARCH, INSTALLED THEN TRAINED ON
APRIL 20th...**

CUT AND DELIVERED 224 SHIMS ON APRIL 21st!

THE STORY:

Rory Rossini (of White Construction) contacted Magna Machine on April 19th. He needed immediate help with an issue holding up the construction of a new solar facility they were building in Randolph County. They required a total of 756 custom-cut shims to complete the project. The 1/16" galvanized steel shims needed to be 5" x 6" with two 11/16" diameter holes. They needed 224 shims by April 21st.

MACHINING

- CNC Machining
- Water Jet Machining
- Manual Machining
- Wire EDM
- 3D Printing

CUSTOM DESIGN-BUILD

- Automated Equipment
- Design & Manufacturing
- General Design & Manufacturing
- Fixtures
- Gages
- Controls

Quick Facts:

- Fast cutting speeds
- Cuts metals and composites
- Cuts glass and plastics
- Clean, smooth edges
- No oils or solvents used
- Environmental "Green" system

WHAT WE ACCOMPLISHED:

- Provided a quote to Rory for fabricating the 756 shims on the morning of April 20th.
- Rory immediately provides the approval to process.
- Upon initial contact, the Magna Team prioritized finding material, and once the approval was received, we picked up the material from our local vendor base.
- The material was set up on the new water jet, and we were cutting shims for first delivery on April 21st
- Our team overcame the learning curve and successfully began filling the order on time and as specified.
